journal of MEMBRANE SCIENCE

Contents

Binary metal-ion sorption during permeation through chelating porous membranes
S. Konishi, K. Saito, S. Furusaki (Tokyo, Japan) and T. Sugo (Takasaki, Japan) 1
Preparation of silica-based microporous inorganic gas separation membranes
M.J. Muñoz-Aguado and M. Gregorkiewitz (Madrid, Spain) 7
Membrane charge of microporous glass membrane determined by the membrane potential method and its pore size dependency
R. Takagi (Nishinomiya, Japan) and M. Nakagaki (Tokyo, Japan) 19
C_4 olefin/paraffin separation by poly[(1-trimethylsilyl)-1-propyne]-graft-poly(acrylic acid)-Ag^+ complex membranes
J.-S. Yang and G.-H. Hsiue (Hsinchu, Taiwan, ROC) 27
A study of fouling in the ultrafiltration of passion fruit juice
R. Jiraratananon and A. Chanachai (Bangkok, Thailand) 39
Fouling reduction in poly(acrylonitrile-*co*-acrylamide) ultrafiltration membranes
D.A. Musale and S.S. Kulkarni (Pune, India) 49
Characterization of membranes prepared from PPO by Raman scattering and atomic force microscopy
K.C. Khulbe, B. Kruczek, G. Chowdhury, S. Gagné, T. Matsuura and S.P. Verma (Ottawa, ON, Canada) 57
Effect of particulate matter on mass transfer through microporous hollow fiber membranes
N.R. Pakala and A.S. Bhown (Menlo Park, CA, USA) 71
Properties of the TiO_2 membranes prepared by CVD of titanium tetraisopropoxide
H.Y. Ha, S.W. Nam, T.H. Lim, I.-H. Oh and S.-A. Hong (Seoul, South Korea) 81
Evidence for spinodal decomposition and nucleation and growth mechanisms during membrane formation
S.P. Nunes (Campinas-SP, Brazil) and T. Inoue (Tokyo, Japan) 93
Scale-up of the vortex wave microfilter using the power ratio
H. Millward and B. Bellhouse (Oxford, United Kingdom) 105
Characterization and mechanical support of asymmetric hydrogel membranes based on the interfacial cross-linking of poly(vinyl alcohol) with toluene diisocyanate
R.H. Li and T.A. Barbari (Baltimore, MD, USA) 115
Composite Pd/Ta metal membranes for hydrogen separation
N.M. Peachey, R.C. Snow and R.C. Dye (Los Alamos, NM, USA) 123
Integration of pervaporation for the removal of water in the production process of methylisobutylketone
C. Staudt-Bickel and R.N. Lichtenthaler (Heidelberg, Germany) 135

Short communication
Alternatives for the reduction of Cu(II) ion levels in hemodialysis membranes produced from sugar-cane bagasse
G.R. Filho, D.A. Leal, D. Da Silva Peres and R. Ruggiero (Uberlândia-MG, Brazil) 143

Meetings calendar 147

Materials of high-temperature electrochemical oxygen membranes
V.V. Kharton, E.N. Naumovich and A.V. Nikolaev (Minsk, Republic of Belarus) 149
Water and ion transport in the cation exchange membrane systems NaCl–$SrCl_2$ and KCl–$SrCl_2$
T. Okada (Ibaraki, Japan), S. Kjelstrup-Ratkje, S. Møller-Holst (Trondheim, Norway), L.O. Jerdal, K. Friestad, G. Xie (Ibaraki, Japan) and R. Holmen (Trondheim, Norway) 159
Relation of gas permeability with structure of aromatic polyimides I
Y. Hirayama, T. Yoshinaga, Y. Kusuki, K. Ninomiya (Chiba, Japan), T. Sakakibara and T. Tamari (Kagoshima, Japan) 169
Relation of gas permeability with structure of aromatic polyimides II
Y. Hirayama, T. Yoshinaga, Y. Kusuki, K. Ninomiya (Chiba, Japan), T. Sakakibara and T. Tamari (Kagoshima, Japan) 183

Surface modification of ultrafiltration membranes by low temperature plasma. II. Graft polymerization onto polyacrylonitrile and polysulfone
M. Ulbricht and G. Belfort (Troy, NY, USA) 193
Thermodynamic interpretation of polyionic membrane cell emf's in terms of mixed electrolytes activities
S. Rondinini and P.R. Mussini (Milan, Italy) 217
Simulation of a pervaporation system on the industrial scale for water treatment. Part I: Extended resistance-in-series model
M.G. Liu, J.M. Dickson and P. Côté (Hamilton, Ontario, Canada) 227
A unified model for flux prediction during batch cell ultrafiltration
S. Bhattacharjee, A. Sharma and P.K. Bhattacharya (Kanpur, India) 243
Hybrid liquid membrane (HLM) system in separation technologies
V.S. Kislik and A.M. Eyal (Jerusalem, Israel) 259
Hybrid liquid membrane (HLM) and supported liquid membrane (SLM) based transport of titanium(IV)
V.S. Kislik and A.M. Eyal (Jerusalem, Israel) 273

Short communications
Effects of colloidal silica incorporation on oxygen/nitrogen separation properties of ceramic-supported 6FDA-IPDA thin films
M. Moaddeb and W.J. Koros (Austin, TX, USA) 283
Polymer inclusion membranes containing macrocyclic carriers for use in cation separations
A.J. Schow, R.T. Peterson and J.D. Lamb (Provo, UT, USA) 291
